

TURNKEY PROJECT SOLUTION

Green Field Project, Design, Quality Management System, Value Added Services

Turnkey project solution is an integrated process where the consultant provides all solutions and supply chain services, including design, engineering, machinery procurement, installation, aftersales support, technical service, documentation.

The project consultancy has characteristic of Knowledge, Performance & Inter-personal Skills. The customer / client's requirements is very essential during the project life cycle and all is looking after by Project consultant during their services and helpful to management solution to enhance and growth the efficiency and outcome of a good project.

About Turnkey Project Solution

Turnkey project solution is an integrated process where the consultant provides all solutions and supply chain services, including design, engineering, machinery procurement, installation, aftersales support, technical service, documentation. Basically, the company outsources the design and solutions of a project to a third-party consultants who takes **responsibility for the entire project**, from design to completion and all the way to commissioning.

This doesn't mean everything is handed over – many companies choose to work in partnership with a turnkey manufacturer, providing layouts, basic designs, and purchasing some new equipment or choosing to integrate existing equipment into the line.

Benefits of Turnkey Project Solution

Many Pharmaceutical, food & beverages, brewing, confectionary processing companies have experienced the benefits of and continue to use turnkey services for a simple reason: it's much easier and reliable.

Project Costs Will Decrease

When design, engineering, and installation are all handled by the same company, it saves you time and money.

It's easier for a project consultant to provide discounts on their services and reduce the overall cost of your project than it is to get discounts from multiple different companies.

Plus, when you outsource the engineering and procurement services to a turnkey project consultant, you won't have the staff needed to pull off a massive project like that on your payroll. Less labour expenses are always a **Plus+**

Single Point Contact

Nothing kills the timeline of your project like having to communicate with multiple companies and trying to get multiple companies to communicate with each other. You'll find yourself spending hours trying to make a single change and get all the parties involved up to speed.

A turnkey project Consultant eliminates the hassle of communicating with multiple companies. Rather than contacting your equipment designer, following up with the manufacturer, and contacting the designer again, you only need to contact the turnkey consultant and they handle the rest. One email. One phone call. Everything is taken care of.

Design and Actual Project Sync

When your equipment and facility layout design and manufacturing are handled by the same company, changes are easy. No more contacting your designer, following up with the manufacturing, re-contacting your designer with information from the manufacturer. Turnkey consultant provide design and manufacturing in one – making the communication between designer, manufacturer, and installer all in one.

Any change to the design of your equipment is immediately communicated and factored into the manufacturing and installation process, without extra phone calls and headaches.

Quality Wins with Turnkey Projects

Right from the start, a turnkey project consultant can set the level of quality needed for your project, and guarantee that each team – design, engineering, procurement and installation – all provide that same level of quality.

When one company handles your project from concept to completion, it's easier to guarantee a higher quality product.

With the contact of multiple different companies. You'll find one always produces at a lower level of quality, which causes setbacks and delays in the process as mistakes need to be corrected.

Discover the benefits for yourself and see how easy it is to get your project done when you place it in the hands of a reliable, professional turnkey consultant  **MachineDaddy**
